Burckhardt Compression provides Laby® compressors for LNG carrier with X-DF propulsion system

Burckhardt Compression is outfitting a 30,000 m³ LNG carrier operated by Knutsen OAS Shipping AS with Laby® compressors. The Laby® compressors will be delivered to Hyundai Mipo Dockyard as part of the fuel gas supply system built by Wärtsilä Oil & Gas Solutions and will supply the LNG carrier's WinGD X-DF 2-stroke, dual-fuel engine with LNG boil-off gas as fuel.

The X-DF engine, a two-stroke engine from Winterthur Gas & Diesel, allows both natural gas and marine diesel to be used as fuel for ship propulsion systems. Ship operators can switch between the two fuel types, maritime diesel and the boil-off gas that inevitably evaporates from LNG storage tanks, during operation.

About Burckhardt Compression

Burckhardt Compression is the worldwide market leader for reciprocating compressor systems and the only manufacturer and service provider that covers a full range of reciprocating compressor technologies and services. Its customized compressor systems are used in the upstream oil & gas, gas transport and storage, refinery, chemical, petrochemical and industrial gas sectors. Burckhardt Compression's leading technology, broad portfolio of compressor components and the full range of services help customers around the world to find the optimized solution for their reciprocating compressor systems. For 175 years its highly skilled workforce has crafted superior solutions and set the benchmark in the gas compression industry.
